Full Stack Application and Web Projects

Disney Themed Trivia Game – <https://nicolejayer.github.io/TriviaGame/>

- Class assignment: students were asked to create a browser based trivia game.
- Technical skills used: Bootstrap, JavaScript, jQuery, HTML/CSS, Git/GitHub.

Pho-Finder – <https://laraek.github.io/Pho-Finder/>

- Group project: Created a web-based application that had the ability of identifying the best Pho restaurants by accessing the user's current location. The application displays ten results for Pho restaurants nearest to the user's location as well as the rating of the restaurant and a photo feature.
- Technical skills used: JavaScript, jQuery, Bootstrap, AJAX, JSON, Git/GitHub.

Bob's Burgers Eat Da Burger Application – <https://github.com/NicoleJayer/Burger>

- Class assignment: Bob's Burgers Eat Da Burger assignment is a restaurant application that allows the user to enter burgers into a database, displays them and then provides an option to "devour" the item. Once the item is "devoured", it is marked as so in the database and then the item is moved to another location on the page. The application also lets the user have the option of entering new burgers into the database.
- Technical skills used: JavaScript, jQuery, Bootstrap, JSON, Git/GitHub, MySQL, Node.js, Express.js, Handlebars, and Sequelize.
